

# Polar Bear Reading Buddy

Use felt or colored construction paper. You need white, light blue and black.

1. Carefully cut out pieces below. Lay out the pieces on the felt or paper, then trace. (Lay them out first, so they all fit.) Or, you can also try putting the paper template on top of the felt or construction paper and cutting through both the paper layer and the felt layer at the same time.
  - White: front, back, arms, and inner bear
  - Black: book, eyes and nose
  - Blue: inner ears, foot pads, snout, tummy
2. Assemble bear to look like picture to the left, and glue together. You can use Elmer's glue. Hot glue or sewing will also work on felt if you have an adult helper.
